# Artist's Statement

I have a get-in-there-and-do-it way of creating—pieces evolve until they reveal how they “want” to be finished.

I often cut combine and pieces of gourds to create sinuous, whimsical forms that are not necessarily natural to the gourd. Simple, organic embellishment and found objects are used to highlight the shape of the piece.

My work reflects my fascination with organic forms and nature. I hope it makes you smile.
